

We are an international software company, and our mission is to make manufacturing more intelligent, more efficient, and more flexible. Our 50 professionals in Germany, India and China are dedicated to developing new technologies, and to making the smart factory vision a reality.

As a subsidiary of Eisenmann SE, we can draw on over 25 years' experience in the development and implementation of pioneering software solutions. As a team, we value working together closely and constructively to find novel solutions.

Join our team, and help shape the future as a

SOFTWARE APPLICATION DEVELOPMENT CONSULTANT

at our facility in Boeblingen, Germany.

Your role:

- To contribute to the standardization and strategic development of our E-MES production control system – including the development and maintenance of applications
- Ideally, to complete tasks across the entire process. This entails:
 - Independently compiling requirements analyses while working closely with our customers and partners
 - Developing solution designs and concepts, and agreeing these with our customers
 - Programming and testing software applications in collaboration with our development department
 - Documenting the outcomes and creating training materials

Your profile:

- You are interested in software development and working for an agile and dynamic start-up.
- You have a degree combining business studies and IT, in electrical engineering, or in mechatronics – or equivalent qualifications
- You have experience in customer-specific software development.
- You are familiar with Java and JavaScript, and understand databases and web technologies.
- Ideally, you have experience in developing applications for MES and/or for visualization, automation, and commissioning in plant engineering.
- You possess an analytical mindset, have strong communications skills, and welcome new challenges.

Your application:
